Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

Claims 1-10 are pending in this application.

#### ***Information Disclosure Statement***

1. The information disclosure statement (IDS) submitted on 4/8/2004 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

#### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4, and 7-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Takeuchi et al(US 6,174,896).

Takeuchi et al, Certificate of correction, page 5 of 6, last compound, column 4, lines 5-6, anticipate instant compounds, composition and method of treatment.

#### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

6. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Takeuchi et al.

Takeuchi et al, last compound in the certificate of correction, page 5 of 6, column 3, line 60 and column 4, lines 5-6, teach structurally similar compounds, composition and method of treatment as claimed herein. Note, various salts including bromide salts, in column 61 and 62. Also note, column 7, lines 10-13. The anions for the salts are described in column 7, lines 27-60, which are similar to those claimed herein. The difference between the reference and herein claimed subject matter is that the reference has not made all the compounds as claimed herein.

It would have been prima facie obvious to one of ordinary skill in the art at the time the invention was made to use the Takeuchi reference and make compounds within the generic disclosure of the reference, because the reference is expressly teaching structurally similar compounds as claimed herein with the same quaternary ammonium salts as claimed herein, with the reasonable expectation of achieving a successful pharmaceutical composition for treating asthma and other respiratory related diseases, absent evidence to the contrary.

No claim is allowed.
